

# *Known Issues*

Revised on August 24, 2025

With GibbsCAM 2026 build 26.0.42.0 and later, all Adv. 3D Machining strategies, combinations, and options, except “Toolpath Splitter”, are now ready for your focused, detailed oriented, and creative testing.

Please review the “What’s New in GibbsCAM 2026” PDF to familiarize yourself with all the enhancements in this release.

We are pushing hard to deliver the most powerful, polished, and stable release, and you are a very important part of making that happen. Every insight, every defect report, every “what if” you raise brings us closer to excellence.

We will keep the README updated with each new build, so stay tuned and keep exploring.

Thank you for your energy, your attention to detail, and your commitment.

GibbsCAM Product Team.
